

For Immediate Release

Eco-Tec Awarded Ultra Super Critical Boiler Water Treatment System Contract by Black & Veatch

April 21, 2008 Pickering, Ontario – Eco-Tec is proud to announce that it has recently been awarded the contract for Sandy Creek Power Partners' water treatment system by Black & Veatch.

"We are extremely pleased to be able to showcase our capabilities and expertise in super critical, and ultra super critical boiler feed water purification applications." Stated Mike Dejak, Eco-Tec President. "Eco-Tec's advanced technology, integrated into complete engineered solutions to meet clients needs, allows us to offer the most economical and efficient systems to the power market."

The Sandy Creek Power Partners water treatment system includes two trains consisting of Eco-Tec's patented Spectrum Micro Media Filters™, Eco-RO™, and Recoflo® demineralizers. The system is configured to produce product quality of 0.1 µS/cm at 400 gpm by processing tertiary treated waste water.

Black & Veatch's Sandy Creek 900 MW Clean Coal Power Plant, located in Riesel, Texas is designed with the latest in clean technology, with less emissions, and is an example of the future of coal-fired power plants.
